Important Safety Reminders

Hurricane/Tropical Storm Preparation & Safety Tips

Hurricane Season Runs June 1st - November 30th

- Assemble a 'Go-Kit' for family and pets with food and supplies.
- Move vehicles away from flood-prone areas.
- Make arrangements for temporary shelter for pets in the event of evacuation.
- Do Not tape glass windows with an X, but do close curtains.
- Have battery-operated lanterns on hand with extra batteries. Do not use candles.
- Charge your cell phone and check fire extinguishers and smoke detectors.
- Fuel vehicles and back-up generators, adjust refrigerators to coldest settings.
- Store all lawn and patio objects that could blow away.
- Stay away from downed utility wires - they may be live and cause harm.
- Keep coolers filled with ample ice/frozen bottled water.
- Place important papers in a waterproof container or in a safe deposit box.
- Check with elderly neighbors or shut-ins. Set up a buddy system to assist them.
- Hold a family meeting to discuss evacuation procedures.
- Purchase flood insurance and conduct an insurance check-up.
- Never use a generator indoors and keep it at least 20 feet away from your home.
- Take photos/video of your property before and after the storm.

Visit the National Hurricane Center at Hurricanes.gov

If an evacuation of coastal areas is ordered, evacuate immediately. High tides and strong winds may cause early flooding and make low-lying roads impassable. Pay attention to potential hazards and impacts, NOT the category of the storm. Water is the chief cause of death in a tropical cyclone. Learn the best evacuation route before a storm forms. Make arrangements to stay with friends or relatives inland until the storm has passed and don't forget to take your "Disaster Supply Kit."

- Tune your NOAA Weather Radio to 162.550 MHz for up-to-the-minute National Weather Service forecasts, warnings and more, 24-hours a day.
- Residents who need further information, such as evacuation warnings, emergency shelter locations and to get assistance in evacuating, contact the Nassau County Department of Emergency Management, 573-0636, www.nassaucountyny.gov/OEM.

Snow Storm Preparation & Safety Tips

Please help our Snow Crew help you! The Town Highway Department is prepared with over 25,000 tons of salt and sand and pretreats roadways before the start of a storm to reduce icing.

Plowing operations - including a snow-fighting fleet of about 300 pieces of equipment - get underway once an accumulation of 2-3 inches of snow is on the ground. Anything less is treated with salt and sand.

Please Move Your Cars Off The Street!

Whether you move your cars into your driveway, ask a neighbor for permission to use theirs or park temporarily on the sidewalk, it is vital that streets are clear of cars for proper curb to curb plowing.

Do not Blow or Shovel Snow into the Street

Please be considerate of how and where you pile your snow when shoveling or using a snowblower. Always shovel snow or aim a snowblower chute back onto your property.

Clear Sidewalks, Fire Hydrants & Street Drains

Safety is key. Please dig out any fire hydrants and street drains on or near your property. Clear your sidewalks of snow to ensure it is safe for pedestrians. Please be careful. Over exhaustion can lead to serious health risks.

We Appreciate Your Patience

Please don't take it personally if plows push snow back into your driveway. This is unavoidable due to the design of every snowplow. Stagger your shoveling or wait until the plows have passed. We thank you for your patience and cooperation.

During severe snow storms, sanitation and recycling collection may be postponed. Sign up for storm notification updates at www.oysterbaytown.com/smart911 or call (516) 677-5350.
